8600 – TRANSPORTATION

It is the policy of the Board of Education to provide transportation for those students whose distance from their school makes this service necessary within the limitations established by State law and the regulations of the State Superintendent of Instruction. Such laws and rules shall govern any question not covered by this policy.

School buses shall be purchased/leased, housed, and maintained by the District for the transportation of resident students between their home areas and the schools of the District to which they are assigned. The Superintendent may substitute smaller buses for reasons of economy or efficiency of operation.

Children living within a 1.5 mile radius of the school shall not be entitled for bus transportation.

Exceptions to the foregoing limits may be made in the case of a temporarily or permanently disabled child who has been so certified by a physician and in the case of adverse safety conditions.

Transportation of eligible vocation or special education children between their home areas and schools outside the District shall be arranged through the use of District-owned vehicles, through cooperation with other districts, through cooperation with other districts, through commercial carriers, and/or by other means in the most efficient and economical manner.

Bus routes shall be established so that an authorized bus stop is available within reasonable walking distance of the home of every resident student entitled to the transportation services.

The Superintendent may authorize the installation and operation of video cameras on District buses to enhance student safety and well-being. S/He shall establish administrative guidelines for the proper use of the cameras.

The Superintendent shall be responsible for developing and implementing appropriate guidelines for the policy.
